**Subject:** RE: tech meeting notes, 09 June 2017- EPA-Tribe monitoring well network plan call in advance of state tech call

Good Morning Anthony,

Now that the EPA-Tribe jointly developed well locations have been proposed to WDNR and the WDNR has responded, it was our understanding that EPA and the Tribe would discuss the monitoring well network plan before our next call with the state.

This would be consistent with our understanding of the facilitated agreements and consistent with the consultation agreement –see Larry’s July 29, 2015 initial consultation meeting letter item 4.

*“..In recognition of the importance of Haskell Lake to the Tribe and of EPA’s trust responsibility to help protect Tribal trust resources, the EPA has agreed to undertake, in close coordination with the Tribe and with direct participation by the Tribal NRD, a remedial investigation of the Site, to be conducted in parallel with the work to be performed by the WDNR, but independent of the state funded work, and for the specific purpose of supplementing the work to be performed by WDNR so that adequate data may be available to implement a timely site remedy at the Site.”*

affirmed in Margaret’s September 2, 2015 letter and specifically included in Margaret’s December 21, 2015 letter as

*“..In recognition of the importance of Haskell Lake to the Tribe and of EPA’s trust responsibility to help protect Tribal trust resources, the EPA has agreed to undertake, in close coordination with the Tribe and with direct participation by the Tribal NRD, a remedial investigation of the*

*Site, to be conducted in parallel with the work to be performed by the WDNR, but independent of the state funded work, and for the specific purpose of supplementing the work to be performed by the WDNR so that adequate data may be available to implement a timely remedy at the Site.*

The availability of Tribal Staff for the EPA-Tribe well placement call is:

Wednesday 6/21: 8 am – 12pm

Agenda Topics:

Monitoring well network plan and implementation

Communication

Your help facilitating the EPA-Tribe monitoring well network plan call before EPA and the Tribe revisit this issue with the State is appreciated.

Sincerely,

Kristen Hanson

Environmental Response Program Coordinator

Lac du Flambeau Tribal Natural Resource Department

**Subject:** tech meeting notes, 09 June 2017

All: I attached a summary of the discussion Friday morning, regarding additional Haskell Lake well installations recommended to WDNR by EPA and LDF. The 4th Thursday (22 June) was suggested for the next tech meeting. There was also some discussion of manager meetings to address different issues, but no dates were offered. Please confirm or arrange dates for either meeting and inform appropriate attendees. Thanks.

V/r,

Anthony Greenwater, Director
